POSTA PEC

OGGETTO I.2.b.d Segnalazione articolo pericoloso Notifica SR/00738/26, SR00784/26; SR/00759/26; SR/00757/26 e SR/00758/26 Safety Gate (ex RAPEX): giocattolo con tremolite, amianto rischio chimico

In riferimento all'oggetto si rappresenta quanto segue.

Si segnalano alcune notifiche (in allegato), disponibili nel sistema Safety Gate - ex RAPEX, relative a giocattoli con tremolite (amianto), in ottemperanza a quanto previsto dal decreto legislativo n 206 del 6 settembre 2005 "Codice del Consumo".

In alcune delle notifiche potrebbe essere segnalata la destinazione dell'articolo in Italia, ma non è presente una lista di distribuzione, in ogni caso alcuni dei prodotti presentano etichettatura in italiano ed è, quindi, possibile che la commercializzazione avvenga anche on-line sul mercato italiano.

Alla luce del rischio come segnalato e della popolazione cui questi prodotti sono destinati si chiede a codesto Comando di attivarsi per le verifiche di competenza.

Inoltre, si chiede a codeste Regioni e province Autonome di valutare l'opportunità e le eventuali modalità con cui attivarsi, per quanto di competenza.

Si rappresenta, infine, che tali prodotti potrebbero essere stati acquistati da strutture destinate all'infanzia, incluse le scuole, ed essere, quindi, disponibili presso i consumatori.

Per la delicatezza dell'argomento si invita nel caso di rinvenimento dei prodotti a valutare la possibilità di informare i consumatori sulle modalità di smaltimento e riconsegna degli stessi.

Infine, si informa che nel caso venissero rinvenuti articoli simili va valutato se provvedere all'analisi della composizione presso i Competenti Centri Regionali Amianto per escludere la eventuale presenza di tali contaminanti.

LA DIRETTRICE DELL'UFFICIO 4

Dott.ssa Valeria Dusolina Di Giorgi Gerevini

Monster nr.	Referentie	Materiaal	Soort(en) asbest en gewichtsprocenten (m/m)	Hechtgebonden ^{n*}	Opmerkingen

* Schatting hechtgebondenheid (optioneel) conform NEN 5896

Toelichting

De resultaten hebben uitsluitend betrekking op de onderzochte monsters. Nomacon Asbestlaboratorium B.V. is niet aansprakelijk voor interpretaties of conclusies die gedaan zijn naar aanleiding van de verkregen resultaten. Alleen gehele reproducties van dit rapport zijn geldig. Bij monsterneming door klant kan geen uitspraak worden gedaan over de herkomst, representativiteit en overige onderdelen van de monsterneming. Het adres en datum van de monsterneming is ook afkomstig van de opdrachtgever en valt buiten de verantwoordelijkheid van het laboratorium. Bij materiaaltipe en hechtgebondenheid is de bevinding opgenomen die op het laboratorium van Nomacon Asbestlaboratorium B.V. is geconstateerd. Deze kan afwijken van de waarneming die in het veld is gedaan. Wanneer in organisch gebonden materialen (bijvoorbeeld colovinyltegels, katten, teerlagen) of in kleefmonsters met de standaard analyse, stereo- en polarisatiemicroscopie (PLM) geen asbestvezels worden gedetecteerd, bevelen wij aan de monsters met scanning elektronen microscopie (SEM) te laten analyseren. Organisch gebonden materialen kunnen asbestvezels bevatten met een dusdanig kleine doorsnede en lengte dat ze met PLM niet gedetecteerd kunnen worden, waardoor de analyseresultaten vals negatief kunnen zijn. Alle documenten behorende bij deze rapportage zijn gecontroleerd en geautoriseerd door de directeur of diens vervanger. Indien twijfel bestaat over de echtheid van dit document kunt u dit verifiëren via verificatie@nomalab.nl o.v.v. het projectnummer. Nomacon Asbestlaboratorium B.V. is een door de Raad voor Accreditatie geaccrediteerd laboratorium onder nummer L582.

Directeur

Dhr. Joram Buissant des Amorie

Test/Method	Unit	Result
Qualitative analysis of asbestos by TEM (LE07J) NFX43-050 July 2021 Norm, Microscopy (TEM), Subcontracted		
Matter concentration (%)		Detected !
Asbestos		tremolite asbestos, chrysotile asbestos fibres !

The results and observations of this test report only concern the sample provided to the laboratory and tested. For tests not requiring sampling, the results only concern the sample such as received. Except specific case, the sample will be kept during the duration mentioned in the contract or by default in our terms and conditions from the date indicated on the present document. The sample and the information regarding the sample have been provided by the client. All information related to the sample are under liability of the client and have not been checked by the Eurofins company.

This test report is not aimed to give an exhaustive conformity to regulations. It only refers to qualitative and quantitative criteria which allow declaring the compliance to specifications of the reference file when provided by the customer.

The result (excluding microbiological analyses) is declared not compliant when, in spite of taking into account the measurement uncertainty at a 95 % trust level (if available), the value found cannot be included in the specification interval and/or be inferior to the regulatory limit.

The copy of this report is only authorized by unabridged edition. Any publication of this report must be authorised by Eurofins.

Analytical method used for the determination of asbestos in bulk materials :

Transmission Electron Microscopy (TEM) performed in accordance with usefull parts of NFX 43-050

Méthode d'analyse employée pour la recherche qualitative des fibres d'amiante dans les matériaux :

Microscopie Electronique à Transmission (MET) réalisée selon les parties pertinentes de la norme NFX 43-050

NB : Traceability information is available on demand

NB : Les informations de traçabilité sont disponibles sur demande

NB 2: Unless otherwise indicated on this report, the laboratory will analyze the buyer-provided sample layer by layer. Components are described simultaneously in a same layer if it was impossible to get separated samples for analysis.

NB 2: Sauf information contraire sur ce rapport, le laboratoire effectue une analyse couche par couche de l'échantillon transmis par le demandeur. Des composants décrits simultanément dans une même couche n'ont pas pu faire l'objet de prises d'essais séparées pour l'analyse.

NB 3 : "No asbestos fibre detected" at PLM means that optically visible asbestos fibres can be present in the sample, in less quantity than the guaranteed Limit of Detection. To be optically visible, the fibre diameter must be higher than 0.2µm.

"No asbestos fibre detected" at TEM means that asbestos fibres can be present in the sample, in less quantity than the guaranteed Limit of Detection.

NB 3 : "Fibres d'amiante non détectées" au MOLP, signifie que la couche peut renfermer une teneur inférieure à la limite de détection garantie de fibre d'amiante optiquement observable. Pour être optiquement observable, une fibre doit avoir un diamètre supérieur à 0,2 µm.

"Fibres d'amiante non détectées " au MET signifie que la couche peut renfermer une teneur inférieure à la limite de détection garantie de fibre d'amiante.

NB 4 : For asbestos research in bulk materials, the guaranteed Limit of Detection in each test sample (at PLM and/or TEM) is 0.1% in weight

NB 4 : Pour la recherche d'amiante dans les matériaux, la limite de détection garantie par prise d'essai dans les matériaux (en MOLP et /ou en MET) est de 0.1% en masse.

Analytical method used for the determination of asbestos in bulk materials :

Transmission Electron Microscopy (TEM) performed in accordance with usefull parts of NFX 43-050

Méthode d'analyse employée pour la recherche qualitative des fibres d'amiante dans les matériaux :

Microscopie Electronique à Transmission (MET) réalisée selon les parties pertinentes de la norme NFX 43-050

NB : Traceability information is available on demand

NB : Les informations de traçabilité sont disponibles sur demande

NB 2: Unless otherwise indicated on this report, the laboratory will analyze the buyer-provided sample layer by layer. Components are described simultaneously in a same layer if it was impossible to get separated samples for analysis.

NB 2: Sauf information contraire sur ce rapport, le laboratoire effectue une analyse couche par couche de l'échantillon transmis par le demandeur. Des composants décrits simultanément dans une même couche n'ont pas pu faire l'objet de prises d'essais séparées pour l'analyse.

NB 3 : "No asbestos fibre detected" at PLM means that optically visible asbestos fibres can be present in the sample, in less quantity than the guaranteed Limit of Detection. To be optically visible, the fibre diameter must be higher than 0.2µm.

"No asbestos fibre detected" at TEM means that asbestos fibres can be present in the sample, in less quantity than the guaranteed Limit of Detection.

NB 3 : "Fibres d'amiante non détectées" au MOLP, signifie que la couche peut renfermer une teneur inférieure à la limite de détection garantie de fibre d'amiante optiquement observable. Pour être optiquement observable, une fibre doit avoir un diamètre supérieur à 0,2 µm.

"Fibres d'amiante non détectées " au MET signifie que la couche peut renfermer une teneur inférieure à la limite de détection garantie de fibre d'amiante.

NB 4 : For asbestos research in bulk materials, the guaranteed Limit of Detection in each test sample (at PLM and/or TEM) is 0.1% in weight

NB 4 : Pour la recherche d'amiante dans les matériaux, la limite de détection garantie par prise d'essai dans les matériaux (en MOLP et /ou en MET) est de 0.1% en masse.

Test/Method	Unit	Result
Qualitative analysis of asbestos by TEM (LE07J) NFX43-050 July 2021 Norm, Microscopy (TEM), Subcontracted		
Matter concentration (%)		Detected !
Asbestos		Chrysotile asbestos fibres, tremolite asbestos !

PICTURES:

The results and observations of this test report only concern the sample provided to the laboratory and tested. For tests not requiring sampling, the results only concern the sample such as received. Except specific case, the sample will be kept during the duration mentioned in the contract or by default in our terms and conditions from the date indicated on the present document. The sample and the information regarding the sample have been provided by the client. All information related to the sample are under liability of the client and have not been checked by the Eurofins company.

This test report is not aimed to give an exhaustive conformity to regulations. It only refers to qualitative and quantitative criteria which allow declaring the compliance to specifications of the reference file when provided by the customer.

The result (excluding microbiological analyses) is declared not compliant when, in spite of taking into account the measurement uncertainty at a 95 % trust level (if available), the value found cannot be included in the specification interval and/or be inferior to the regulatory limit.

The copy of this report is only authorized by unabridged edition. Any publication of this report must be authorised by Eurofins.
